# Purpose, Mission & Vision

## Purpose

The purpose of RSNB-GiE is to provide an organised, credible, and principled national platform to advance Sabah's cause through peaceful, lawful, democratic, and strategic means.

RSNB-GiE exists to educate, unite, document, advocate, and prepare. It seeks to strengthen national consciousness among Sabahans, raise awareness of Sabah's political cause, engage the international community, and help develop the ideas, structures, and preparation necessary for Sabah to stand as a sovereign and self-governing country.

Our purpose is not only to express national aspiration, but to help build the foundation required to achieve it responsibly.

## Mission

Our mission is to uphold and defend the identity, dignity, and rights of the people of Sabah while advancing the cause of self-determination through peaceful advocacy, research, education, diplomatic engagement, and national preparation.

RSNB-GiE is committed to:

- educating the public on Sabah's historical, political, and national position
- documenting and presenting relevant legal, historical, and political evidence
- promoting peaceful advocacy and constructive public awareness

• engaging in diplomatic and international outreach to build understanding of Sabah's cause

• strengthening unity, awareness, and readiness among Sabahans at home and abroad

• encouraging responsible thought and planning on governance, justice, democracy, and statebuilding

• preparing frameworks that support Sabah's future as a peaceful, democratic, and sovereign

country

## Vision

Our vision is to see Sabah become a sovereign, peaceful, dignified, and self-governing country built on justice, democracy, accountability, and the freely expressed will of its people.

We envision a country in which the people of Sabah are free to determine their own political future, govern their own affairs, manage their own resources, protect their own national identity, and build a just, stable, and prosperous future for generations to come.

We envision the Republic of Sabah North Borneo as a country that is politically self-determined, economically responsible, culturally protected, internationally respected, and governed in the true interests of its own people.
